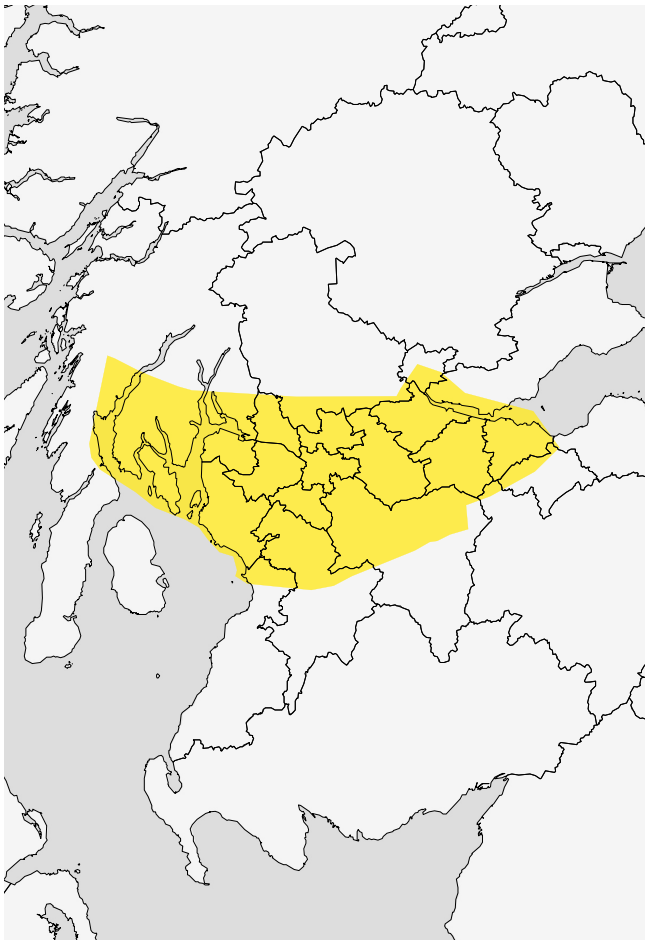
Yellow warning
Snow & Ice

Between
00:00 Fri 19 Jan 2024 and
12:00 Fri 19 Jan 2024



Wintry showers bringing some disruption to transport and travel.

What to expect

- Some roads and railways likely to be affected with longer journey times by road, bus and train services
- Some injuries from slips and falls on icy surfaces
- Probably some icy patches on some untreated roads, pavements and cycle paths

Further details

Wintry showers will bring a mix of rain, sleet and snow overnight and at first tomorrow across the warning area. A few cms of additional snow is possible in places, with ice a hazard on untreated surfaces, or where treatment has been washed off. Showers will turn increasingly to rain from the west during Friday morning, with temperatures slowly rising.

Snowy, wintry weather can cause delays and make driving conditions dangerous. Keep yourself and others safe by planning your route, giving yourself extra time for your journey.

✓ Medium likelihood of low impacts

Yellow warning
Snow & Ice

Between
00:00 Fri 19 Jan 2024 and
12:00 Fri 19 Jan 2024

Further Details (continued)

Check for road closures or delays to public transport and amend plans if necessary.

If driving, make sure you have some essentials in your car in the event of any delays (e.g., warm clothing, food, water, a blanket, a torch, ice scraper/de icer, a warning triangle, high visibility vest and an in-car phone charger).

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
